EDUCATION

Stevens Institute of Technology

Masters of Science in Financial Engineering; Major GPA: 3.81

New York, NY

Sept 2024 - Present

Relevant Coursework: Stochastic Calculus, Pricing & Hedging, Probability Theory, Machine Learning, Deep Learning

Hunter College

Bachelor of Arts in Mathematics; Major GPA: 3.68

New York, NY

Jan 2020 - Present

Relevant Coursework: Numerical Analysis, Real Analysis, Mathematical Statistics, Linear Algebra

Pace University

Bachelor of Business Administration in Finance; Major GPA: 4.0

New York, NY

December 2018

Bachelor of Arts in Economics; Major GPA: 4.0

Honors: Beta Gamma Sigma, Golden Key Society

EXPERIENCE

America On Tech

Data Science Instructor

New York, NY

Nov 2023 - Present

- Facilitate and coordinate weekly lectures, lab projects, coding examples, graded quizzes and homework assignments.
- Design interactive weekly learning modules for more than 50 students with a primary focus on Machine Learning, Statistics, and Data Visualization.
- Guide students in synthesizing popular data science concepts from lectures and applying them to the end of semester lab project.

Alliance Bernstein

Fixed Income Data Research

New York, NY

Jan 2020 - April 2023

- Using statistical and mathematical models to develop and validate quantitative investment strategies
- Analyzing macro, fundamental, and technical drivers affecting fixed income markets
- Produce regular research reports with trade recommendations on fixed income and derivative products

RESEARCH PROJECTS

Mind The Gap: Alternative Investment Strategies For Retail Investors

Business Honors Thesis / Independent Research

New York, NY

Apr 2018 - May 2019

- Developed original quantitative trading strategies based on statistical analysis and market research; constructed 5 unique trading strategies using machine learning algorithms
- Created and implemented statistical analysis to spot homogeneous trends of more than 600 equities; developed trading strategies based on unique quantitative factors (beta, volatility, liquidity and annualized returns)
- Adjusted daily portfolio weights to achieve a maximum total average annualized portfolio return of 36.54%, maximum sharpe ratio of 1.02, and a maximum drawdown of -18.23%

Forecasting The Destination of New Airbnb Users

Kaggle Data Science Competition

New York, NY

Jan 2018 - Apr 2018

- Conducted qualitative/quantitative exploratory data analysis for more than 200,000 Airbnb listings in New York City and 800,000 new users to analysis future price trends and new booking information
- Employed machine learning techniques utilizing logistic regression and random forest classifiers to predict the buying behavior of new users within a 67% accuracy
- Implemented statistical algorithm for entrepreneurial ventures, generating an average rental income of \$3,000 per month

ADDITIONAL SKILLS

Programming: Python, MATLAB, Mathematica, C++, SQL, R, LaTeX, VBA

Machine Learning Frameworks: NumPy, Scikit-learn, Pandas, TensorFlow, Matplotlib, PyTorch

Software: Excel, PowerPoint, Word, Access, Power BI

Languages: English (Native), Mandarin (Intermediate Speaking Proficiency), Cantonese (Basic)
